DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to in vitro immunoassay methods for diagnosing human gastric intestinal metaplasia, classified in class 435, subclass 7.23, for example.
 - II. Claims 11-29, drawn to methods of in vivo diagnosis, classified in class 424, subclass 9.341, for example.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are not capable of use together and they have different method steps, different modes of operation, different functions, and different effects (MPEP § 806.04, MPEP § 808.01).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
